The information in this publication may be reproduced to support SQA qualifications only on a non-commercial basis. If it is to be used for any other purposes written permission must be obtained from SQA's NQ Assessment team.

Where the publication includes materials from sources other than SQA (secondary copyright), this material should only be reproduced for the purposes of examination or assessment. If it needs to be reproduced for any other purpose it is the centre's responsibility to obtain the necessary copyright clearance. SQA's NQ Assessment team may be able to direct you to the secondary sources.

These Marking Instructions have been prepared by Examination Teams for use by SQA Appointed Markers when marking External Course Assessments. This publication must not be reproduced for commercial or trade purposes.

General Marking Principles for National 5 Chemistry

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this Paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these General Marking Principles and the specific Marking Instructions for this assessment.
- (b) If a specific candidate response does not seem to be covered by either the principles or detailed Marking Instructions, and you are uncertain how to assess it, you must seek guidance from your Team Leader.
- (c) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.

A guiding principle in marking is to give credit for correct chemistry rather than to look for reasons not to award marks.

Example 1: The structure of a hydrocarbon found in petrol is shown below.

Name the hydrocarbon.

Although the punctuation is not correct, '3, methyl-hexane' should gain the mark.

- (d) **Example 2:** A student measured the pH of four carboxylic acids to find out how their strength is related to the number of chlorine atoms in the molecule. The results are shown in the table

Structural formula	pH
CH ₃ COOH	1.65
CH ₂ ClCOOH	1.27
CHCl ₂ COOH	0.90
CCl ₃ COOH	0.51

State how the strength of the acids is related to the number of chlorine atoms in the molecule.

Although not completely correct, an answer such as 'the more Cl₂, the stronger the acid' should gain the mark.

- (e) There are no half marks awarded.
- (f) Candidates must respond to the "command" word as appropriate and may be required to write extended answers in order to communicate fully their knowledge and understanding.

- (g) Marks should be awarded for answers that have incorrect spelling or loose language as long as the meaning of the word(s) is conveyed.

Example: Answers like ‘distilling’ (for ‘distillation’) and ‘it gets hotter’ (for ‘the temperature rises’) should be accepted.

However the example below would not be given any credit, as an incorrect chemical term, which the candidate should know, has been given.

Example: If the correct answer is “ethene”, and the candidate’s answer is “ethane”, this should not be accepted.

- (h) A correct answer followed by a wrong answer should be treated as a cancelling error and no marks should be awarded.

Example: State what colour is seen when blue Fehling’s solution is warmed with an aldehyde.

The answer ‘red, green’ gains no marks.

- (i) If a correct answer is followed by additional information which does not conflict, the additional information should be ignored, whether correct or not.

Example: State why the tube cannot be made of copper.

If the correct answer is related to a low melting point, ‘Copper has a low melting point and is coloured grey’ would **not** be treated as having a cancelling error.

- (j) Unless a numerical question specifically requires evidence of working to be shown, full marks should be awarded for a correct final answer (including units if required) on its own.

The partial marks shown in the marking scheme are for use when working is given but the final answer is incorrect. An exception is when candidates are asked to ‘Find, by calculation’, when full marks cannot be awarded for the correct answer without working.

- (k) Where the marking instructions specifically allocate a mark for units in a calculation, this mark should not be awarded if the units are incorrect or missing. Missing or incorrect units at intermediate stages in a calculation should be ignored.

- (l) As a general rule, where a wrong numerical answer (already penalised) is carried forward to another step, credit will be given provided the result is used correctly. The exception to this rule is where the marking instructions for a numerical question assign separate “concept marks” and an “arithmetic mark”. In such situations, the marking instructions will give clear guidance on the assignment of partial marks.

- (m) Ignore the omission of one H atom from a full structural formula provided the bond is shown or one carbon to hydrogen bond missing provided the hydrogen is shown.

- (n) A symbol or correct formula should be accepted in place of a name **unless stated otherwise in the marking instructions**.

- (o) When formulae of ionic compounds are given as answers it will only be necessary to show ion charges if these have been specifically asked for. However, if ion charges are shown, they must be correct. If incorrect charges are shown, no marks should be awarded.

- (p) If an answer comes directly from the text of the question, no marks should be awarded.

Example: A student found that 0.05 mol of propane, C₃H₈ burned to give 82.4 kJ of energy.

Name the type of enthalpy change which the student measured.

No marks should be awarded for 'burning' since the word 'burned' appears in the text.

- (q) Unless the question is clearly about a non-chemistry issue, eg costs in industrial chemical process, a non-chemical answer gains no marks.

Example: Suggest why the (catalytic) converter has a honeycomb structure.
A response such as 'to make it work' may be correct but it is not a chemical answer and the mark should not be awarded.

Part Two: Marking Instructions for each question

Section 1

Question	Answer	Max Mark
1.	D	1
2.	C	1
3.	D	1
4.	B	1
5.	B	1
6.	C	1
7.	A	1
8.	C	1
9.	B	1
10.	C	1
11.	B	1
12.	B	1
13.	A	1
14.	C	1
15.	D	1
16.	D	1
17.	A	1
18.	A	1
19.	C	1
20.	B	1

Section 2

Question			Answer	Max Mark	Additional Guidance												
1.	(a)	(i)	<table><tr><td colspan="3">In the Nucleus</td></tr><tr><td><i>Particle</i></td><td><i>Relative Mass</i></td><td><i>Charge</i></td></tr><tr><td>Proton</td><td>1</td><td></td></tr><tr><td>Neutron</td><td></td><td>0 neutral no charge</td></tr></table> BOTH REQUIRED	In the Nucleus			<i>Particle</i>	<i>Relative Mass</i>	<i>Charge</i>	Proton	1		Neutron		0 neutral no charge	1	
In the Nucleus																	
<i>Particle</i>	<i>Relative Mass</i>	<i>Charge</i>															
Proton	1																
Neutron		0 neutral no charge															
		(ii)	<table><tr><td colspan="3">Outside the Nucleus</td></tr><tr><td><i>Particle</i></td><td><i>Relative Mass</i></td><td><i>Charge</i></td></tr><tr><td>ELECTRON</td><td></td><td>- -1 negative</td></tr></table> BOTH REQUIRED	Outside the Nucleus			<i>Particle</i>	<i>Relative Mass</i>	<i>Charge</i>	ELECTRON		- -1 negative	1				
Outside the Nucleus																	
<i>Particle</i>	<i>Relative Mass</i>	<i>Charge</i>															
ELECTRON		- -1 negative															
	(b)		14.5	1	Accept 14.5 g or 14.5 amu.												
	(c)	(i)	Pyramidal OR Trigonal pyramidal	1	Zero marks awarded for trigonal on its own. Zero marks awarded for 'pyramid'.												
		(ii)	Haber	1													

Question			Answer	Max Mark	Additional Guidance
2.	(a)		$ \begin{array}{cccccc} \text{H} & \text{H} & \text{H} & \text{H} & \text{H} & \text{H} \\ & & & & & \\ -\text{C} & -\text{C} & -\text{C} & -\text{C} & -\text{C} & -\text{C}- \\ & & & & & \\ \text{H} & \text{C}_6\text{H}_5 & \text{H} & \text{C}_6\text{H}_5 & \text{H} & \text{C}_6\text{H}_5 \end{array} $ <p>With or without brackets</p>	1	<p>Do not deduct mark if one end bond is missing.</p> <p>Do not deduct mark if one end bond is shown with other end having an H in place of second end bond.</p> <p>Allow dot or ~ to represent end bond.</p> <p>Zero marks awarded if both end bonds are missing/both ends have H/less than or more than three monomers shown/bond between two carbons missing.</p>
	(b)		$ \begin{array}{cc} \text{H} & \text{CN} \\ & \\ \text{C} & =\text{C} \\ & \\ \text{H} & \text{COOCH}_3 \end{array} $	1	<p>Zero marks awarded if candidate draws both monomers, unless they have clearly identified the acrylonitrile monomer.</p>

Question			Answer	Max Mark	Additional Guidance
3.	(a)		Exothermic OR exothermal	1	Zero marks awarded for 'combustion'. This also negates a correct answer.
	(b)	(i)	<div> <div>0.85 with no working 2 marks</div> <hr/> <div> $\frac{29-12}{30-10}$ or $\frac{12-29}{10-30}$ </div> <div> OR </div> <div> $\frac{17}{20}$ </div> <div> 0.85 </div> <div> (1) </div> <div> (1) </div> </div>	2	<p>1 mark awarded for – correct method (ie change in volume/change in time) but incorrect arithmetic using correct values from table.</p> <p>1 mark awarded for – correct method but incorrect values from the table used (subtractions must be shown and volumes chosen must correspond to chosen times).</p> <p>Award zero marks awarded if correct method is used but values are not in the table.</p> <p>Unit is not required however if the wrong unit is given do not award second mark.</p> <p>Acceptable units are $\text{cm}^3 \text{s}^{-1}$ or cm^3/s or cubic centimetres per second or cm^3 per second.</p> <p>Do not accept $\text{cm}^3/\text{s}^{-1}$ or $\text{cm}^3 \text{s}^{-1}$ or $\text{cm}^3\text{s}-1$ etc. 's' is the only acceptable abbreviation of second.</p>
		(ii)	Any value greater than 50 and less than or equal to 60.	1	<p>Zero marks awarded if correct answer given with incorrect unit of time (eg minutes).</p> <p>'s' is the only acceptable abbreviation of second.</p>

Question			Answer	Max Mark	Additional Guidance
3.	(b)	(iii)	Faster / quicker / increase /speed up	1	Zero marks awarded for less time, but does not negate. Zero marks awarded for "fast" reaction without comparison. Incorrect explanation negates eg the reaction speeds up due to increase in particle size.
	(c)	(i)	$\text{Al}(\text{NO}_3)_3$ circled, underlined etc	1	
		(ii)	<div>0.36 with no working 2 marks</div> <hr/> <div>0.01 moles gives 0.015 moles (1)</div> <div>0.015 \times 24 = 0.36 (1)</div> <div>This step on its own 2 marks</div>	2	<p>If correct mole ratio (2:3) applied and answer of 36 eg 1.5 \times 24 given award max 1 mark (working must be shown).</p> <p>If candidate shows mass of aluminium accept 54g to 72l or 27g to 36l for 1 mark</p> <p>Zero marks awarded for 0.01 \times 24 = 0.24</p> <p>Unit is not required however if the wrong unit is given do not award final mark.</p>

Question			Answer	Max Mark	Additional Guidance				
4.	(a)	(i)	Andalusite and kyanite BOTH REQUIRED	1					
		(ii)	<table border="1"><tr><td>Temperature (°C)</td><td>490 – 510</td></tr><tr><td>Pressure (kbar)</td><td>3.9 – 4.1</td></tr></table> BOTH REQUIRED	Temperature (°C)	490 – 510	Pressure (kbar)	3.9 – 4.1	1	
Temperature (°C)	490 – 510								
Pressure (kbar)	3.9 – 4.1								
	(b)		<p>17 or 17.28 or 17.3 with no working 3 marks</p> <hr/> <p>GFM 162 (1)</p> <p>28/162 × 100 (concept mark) (1) This step on its own 2 marks</p> <p>1 mark for correct arithmetic to give final answer (this mark can only be awarded if the concept mark has been awarded).</p>	3	<p>Maximum 2 marks if candidate correctly calculates percentage of aluminium (33 or 33.3 %) or oxygen (49 or 49.38 or 49.4 %) rather than silicon but working must be shown.</p> <p>Maximum 2 marks if atomic numbers are used (17.5 % of silicon) but working must be shown.</p> <p>If candidate incorrectly rounds to 17.2 then a maximum of 2 marks can be awarded only if working is shown.</p> <p>If value divided by 162 does not correspond to an element in the compound award a maximum of 1 mark.</p> <p>Unit is not required however if the wrong unit is given do not award final mark.</p>				

Question			Answer	Max Mark	Additional Guidance
5.	(a)		Unreactive OR does not react with water/air/alkalis/ (almost all) acids OR Can be beaten into shape OR Found uncombined	1	Zero marks awarded for phrases like “associated with wealth” on their own but do not negate correct answer. Zero marks awarded for soft on its own but does not negate.
	(b)		118	1	
	(c)	(i)	$\text{CO} + \text{O}_2 \longrightarrow \text{CO}_2$ ALL CORRECT FOR 1 MARK OR $\text{CO} + \text{O}_2 \xrightarrow{\text{Au}} \text{CO}_2$	1	If equation is balanced then it needs to be correct eg $2\text{CO} + \text{O}_2 \longrightarrow 2\text{CO}_2$ $\text{CO} + \frac{1}{2}\text{O}_2 \longrightarrow \text{CO}_2$ Zero marks awarded for $\text{CO} + \text{O}_2 = \text{CO}_2$ $\text{CO} + \text{O}_2 + \text{Au} \longrightarrow \text{CO}_2 + \text{Au}$ State symbols should be ignored. Zero marks awarded for a word equation on its own but this does not negate a correct formulae equation.
		(ii)	Catalyst OR catalysis OR speeds up the reaction OR allows less energy/heat to be used for the reaction OR lowers activation energy	1	Zero marks awarded for spectator ion and this negates correct answer.
	(d)		<div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> $\left. \begin{array}{c} \text{hydroxide} \\ \text{hydrogen} \end{array} \right\}$ </div> <div style="text-align: center;"> $\left. \begin{array}{c} \text{hydroxide} \\ \text{hydrogen} \end{array} \right\}$ </div> </div> BOTH REQUIRED	1	

Question			Answer	Max Mark	Additional Guidance
6.	(a)	(i)	<p>Flame test or correct description e.g. burn it/fertiliser/potassium, put in Bunsen flame etc.</p> <p>AND</p> <p>purple/lilac</p> <p>Both required</p>	1	Mention of burning the plant negates correct answer.
		(ii)	<p>To add/provide/supply nitrogen or it contains nitrogen.</p> <p>Any wording that implies that plants need nitrogen.</p>	1	<p>Zero marks awarded for 'essential/key element' on its own but does not negate correct answer.</p> <p>Zero marks awarded for 'to make plants grow better' on its own but does not negate correct answer.</p>
	(b)		<p>$\text{H}_3\text{PO}_4 + 3\text{NH}_4\text{OH} \longrightarrow (\text{NH}_4)_3\text{PO}_4 + 3\text{H}_2\text{O}$</p> <p>If rewritten accept</p> $ \begin{array}{ccc} \text{H}_3\text{PO}_4 & + & 3\text{NH}_4\text{OH} \\ & \downarrow & \\ (\text{NH}_4)_3\text{PO}_4 & + & 3\text{H}_2\text{O} \end{array} $	1	<p>Accept correct multiples</p> <p>If equation is rewritten, all formulae must be correct and correct format see marking instructions for Question 10c(ii).</p> <p>If state symbols are given they must be correct.</p>

Question			Answer	Max Mark	Additional Guidance
7.	(a)		<p>This is an open ended question</p> <p>1 mark: The student has demonstrated a limited understanding of the chemistry involved. The candidate has made some statement(s) which is/are relevant to the situation, showing that at least a little of the chemistry within the problem is understood.</p> <p>2 marks: The student has demonstrated a reasonable understanding of the chemistry involved. The student makes some statement(s) which is/are relevant to the situation, showing that the problem is understood.</p> <p>3 marks: The maximum available mark would be awarded to a student who has demonstrated a good understanding of the chemistry involved. The student shows a good comprehension of the chemistry of the situation and has provided a logically correct answer to the question posed. This type of response might include a statement of the principles involved, a relationship or an equation, and the application of these to respond to the problem. This does not mean the answer has to be what might be termed an “excellent” answer or a “complete” one.</p>	3	

Question			Answer	Max Mark	Additional Guidance
8.	(a)		<p>The correct structural formula for isoprene eg</p> $ \begin{array}{ccccccc} & & & & & & \\ & & & & & & \\ \text{H} & - & \text{C} & = & \text{C} & - & \text{C} & = & \text{C} & - & \text{H} \\ & & & & & & & & & & \\ & & \text{H} & & \text{H} & & \text{H} & & \text{H} & & \\ & & & & & & & & & & \\ & & & & & & \text{H} - \text{C} - \text{H} & & & & \\ & & & & & & & & & & \\ & & & & & & \text{H} & & & & \end{array} $ <p>OR</p> $ \begin{array}{ccccccc} & & & & & & \\ & & & & & & \\ \text{H} & & \text{CH}_3 & & \text{H} & & \text{H} \\ & & & & & & \\ \text{H} - \text{C} & = & \text{C} & - & \text{C} & = & \text{C} - \text{H} \end{array} $ <p>However if CH₃ is used the bond must be going to the carbon</p>	1	<p>Zero marks awarded for</p> $ \begin{array}{c} \text{CH}_3 \\ \\ \text{H}_2\text{C} = \text{C} - \text{C} = \text{CH}_2 \\ \\ \text{H} \end{array} $
	(b)		<p>Diagram showing delivery tube passing into a test tube which is placed in a water/ice bath.</p> <p>Delivery tube must extend close enough to the neck of the test tube to ensure the vapour can enter the test tube.</p>	1	<p>Do not penalise if boiling tube/measuring cylinder etc has been used in place of test tube.</p> <p>Diagram does not need to be labelled.</p> <p>Delivery tube must be open and no lines drawn across it.</p> <p>Ignore a stopper as long as it does not close off the delivery tube.</p>

Question			Answer	Max Mark	Additional Guidance
8.	(c)	(i)	Addition / additional OR bromination	1	Zero marks awarded for 'add.' Zero marks awarded for 'Addition' followed by incorrect answer eg 'polymerisation', 'distillation', 'combustion' etc.
		(ii)	$C_{10}H_{16}Br_4$	1	Symbols can be in any order. Numbers must be smaller than symbol or subscript Symbols must be correct Zero marks awarded for: $C10H16Br4$ $C_{10}H_{16}br_4$ $C_{10}H_{16}BR_4$ $C_{10}H_{16} + Br_4$

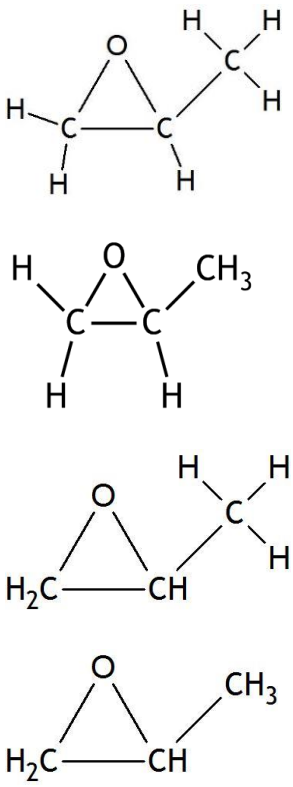

Question			Answer	Max Mark	Additional Guidance
9.	(a)		<p>1 mark for Method A</p> <hr/> <p><i>The second mark for the explanation cannot be awarded if the first mark is not gained.</i></p> <p>1 mark for explanation of accuracy of A (or inaccuracy of B) based on</p> <ul style="list-style-type: none"> Heat loss Heat transfer Mass loss (due to ethanol being combusted/used up) <p>eg</p> <ul style="list-style-type: none"> - Method A because more heat is transferred to water - Method B because less heat is transferred to water - B releases more heat to the surroundings 	2	<p>Explanation is assumed to be for chosen method unless otherwise stated.</p> <p>The explanation mark cannot be awarded for restating or describing Step 3 eg</p> <ul style="list-style-type: none"> the fuel in A doesn't start to burn until it is under the (copper) can / water the fuel in B starts to burn before it is under the (copper) can /water <p>Zero marks awarded for an explanation in terms of evaporation of ethanol but does not negate a correct explanation.</p>

Question			Answer	Max Mark	Additional Guidance
	(b)	(i)	<p>A statement that identifies the effect of changing the position on the energy released.</p> <p>eg</p> <p>If the alcohol is 2-ol then less energy is released compared with 1-ol or vice versa.</p> <p>OR</p> <p>As you move from one to two (carbon/position) then the energy decreases or vice versa.</p> <p>OR</p> <p>As it (the position of the functional group) increases/gets higher, the energy released decreases or vice versa</p> <p>OR</p> <p>Functional group (or it/hydroxyl/-OH) on (position) 1/end carbon/first carbon - energy released is greater/higher/bigger/increases</p> <p>OR</p> <p>Functional group (or it/hydroxyl/-OH) on position 2/not on the end carbon energy released is smaller/lower/decreases</p> <p>OR</p> <p>As it/functional group goes further along/further down/further up the lower the energy or vice versa.</p>	1	<p>Award zero marks for as the number of carbons increase/alcohol gets bigger the energy released also increases or vice versa.</p>
		(ii)	3967 – 3971	1	<p>Unit is not required however if the wrong unit is given do not award mark.</p> <p>Accept kj, kJ, Kj or KJ.</p> <p>Also accept kJ mol⁻¹ or kJ/mol or kilo Joules per mole in words.</p>

Question			Answer	Max Mark	Additional Guidance
	(c)		<p>55 or 55·02 with no working 3 marks</p> <hr/> <p>1 mark for using the correct concept of</p> $\Delta T = E h / c m$ <p>with both 4·18 and 23 correctly substituted</p> <p>1 mark for 0·1 with or without concept</p> <p>1 mark for correct arithmetic (this mark can only be awarded if the concept mark has been awarded).</p>	3	<p>Unit is not required however if the wrong unit is given do not award final mark. Do not accept ° on its own.</p> <p>1 mark awarded if 23000 and 4180 are both used together in correct concept.</p> <p>If a mass of 100 is used then 23000 and 4·18 must be used to access all 3 marks.</p>

Question			Answer	Max Mark	Additional Guidance
10.	(a)		Electrolyte	1	
	(b)	(i)	From zinc to copper on or near the wire/voltmeter	1	Zero marks awarded if – arrow goes into solution – arrow is drawn on wire and ion bridge – arrow is drawn closer to the ion bridge than the wire / voltmeter
		(ii)	Ion bridge OR Salt bridge	1	Correct description of an ion bridge eg filter paper soaked in an electrolyte.
	(c)	(i)	Oxidation	1	Zero marks awarded for redox.
		(ii)	$\text{Br}_2(\ell) + \text{SO}_3^{2-}(\text{aq}) + \text{H}_2\text{O}(\ell) \longrightarrow 2\text{Br}^-(\text{aq}) + \text{SO}_4^{2-}(\text{aq}) + 2\text{H}^+(\text{aq})$ <p>OR</p> $\text{Br}_2(\ell) + \text{SO}_3^{2-}(\text{aq}) + \text{H}_2\text{O}(\ell)$ \downarrow $2\text{Br}^-(\text{aq}) + \text{SO}_4^{2-}(\text{aq}) + 2\text{H}^+(\text{aq})$ <p style="text-align: right;">1</p> <p>State symbols are not required but if included must be correct.</p> <p>Zero marks awarded for any electrons shown in equation, unless clearly scored out.</p> <p>Zero marks awarded for</p> $\text{Br}_2(\ell) + \text{SO}_3^{2-}(\text{aq}) + \text{H}_2\text{O}(\ell) \longrightarrow$ $2\text{Br}^-(\text{aq}) + \text{SO}_4^{2-}(\text{aq}) + 2\text{H}^+(\text{aq})$		
		(iii)	Carbon or graphite	1	Zero marks awarded for hydrogen, diamond or charcoal and these negate a correct answer.

Question			Answer	Max Mark	Additional Guidance
11.	(a)		Methoxypropane (spelling must be correct)	1	Zero marks awarded for propoxymethane.
	(b)		$C_nH_{2n+2}O$ OR $C_nH_{2n+2}O_1$ OR $C_nH_{n2+2}O$	1	Symbols can be in any order eg $H_{2n+2}OC_n$ Accept another letter in place of n eg $C_xH_{2x+2}O$ Zero marks awarded for $C_nH_{2n+2}O$ $C_nH_{2n+2} + O$ $C_nH_{2n+2}O_n$ Award zero marks for $C_nH_{2n+1}OH$, $C_nH_{2n+1}OC_nH_{2n+1}$
	(c)		<div style="text-align: center;"> { WEAK } strong </div> <div style="text-align: center;"> { weak } STRONG </div> BOTH REQUIRED	1	
	(d)	(i)	Ethene / Eth-1-ene OR Ethylene	1	Accept a correct molecular or structural formula for ethene. Incorrect formulae in addition to ethene negates. Mention of any other substance negates.

Question	Answer	Max Mark	Additional Guidance
	<p>(ii) Any acceptable full, shortened or abbreviated structural formula e.g.</p> 	1	<p>Allow one carbon to hydrogen bond to be missing provided the hydrogen is shown.</p> <p>Allow one hydrogen to be missing provided the carbon to hydrogen bond is shown.</p>

Question			Answer	Max Mark	Additional Guidance
12.	(a)		hydroxyl	1	Zero marks awarded for OH however this does not negate hydroxyl. Zero marks awarded for hydroxide and this negates correct answer.
	(b)		Weak acid, strong base/alkali BOTH REQUIRED	1	Zero marks awarded for mention of weak and strong without stating acid or base.
	(c)		15.0	1	Unit is not required however if the wrong unit is given do not award mark. If more than two numbers have been averaged the mark cannot be awarded even if the candidate has the correct answer.
	(d)		0.02	1	Zero marks awarded for 0.02 mol ⁻¹ or 0.02 mol l ⁻¹ etc.

Question			Answer	Max Mark	Additional Guidance
13.			<p>This is an open ended question</p> <p>1 mark: The student has demonstrated a limited understanding of the chemistry involved. The candidate has made some statement(s) which is/are relevant to the situation, showing that at least a little of the chemistry within the problem is understood.</p> <p>2 marks: The student has demonstrated a reasonable understanding of the chemistry involved. The student makes some statement(s) which is/are relevant to the situation, showing that the problem is understood.</p> <p>3 marks: The maximum available mark would be awarded to a student who has demonstrated a good understanding of the chemistry involved. The student shows a good comprehension of the chemistry of the situation and has provided a logically correct answer to the question posed. This type of response might include a statement of the principles involved, a relationship or an equation, and the application of these to respond to the problem. This does not mean the answer has to be what might be termed an “excellent” answer or a “complete” one.</p>	3	<p>0 marks: The student has demonstrated no understanding of the chemistry involved. There is no evidence that the student has recognized the area of chemistry involved or has given any statement of a relevant chemistry principle. This mark would also be given when the student merely restates the chemistry given in the question.</p>

[END OF MARKING INSTRUCTIONS]
