General marking principles for National 5 Modern Studies

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors and omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your Team Leader.
- (d)
 - (i) For credit to be given, points must relate to the question asked.
 - (ii) There are five types of questions used in this question paper:
 - A Describe, in detail, . . .
 - B Explain, in detail, . . .
 - C What conclusions can be drawn
 - D You must decide which option to recommend
 - E Explain why the view . . . is selective in the use of facts.
 - (iii) For each of the question types in this paper, the following provides an overview of marking principles and an example of its application for each question type.

Questions that assess Knowledge and Understanding (4, 6 or 8 marks)

- Award up to **3 marks** for any single **description**, depending on quality, level of detail, relevance, accuracy and exemplification.
- Award up to **4 marks** for any single **explanation**, depending on quality, level of detail, relevance, accuracy, exemplification and answers which show the interaction of various factors.
- List type answer, made up of a series of undeveloped points should be awarded a maximum of **2 marks**.
- Full marks can be achieved by any combination of single and developed points in line with specific marking instructions.
- Where candidates are instructed to give specific knowledge and understanding related to a particular topic or issue, markers should refer to the marking instructions for the question.

Questions that assess the evaluation of sources (8 or 10 marks)

- Award up to **3 marks** for a developed point depending upon the quality of the explanation and development of the evidence.
- Candidates should be highly credited if they synthesise information within and between sources.
- For **full marks**, the candidate must refer to all sources in their answer. Award a maximum of **6 marks** if only two sources are used, maximum of **4 marks** if only one source is used.

Questions that require the candidate to use a limited range of sources and draw valid conclusions from them, with supporting evidence.

- Candidates should draw conclusions using the headings/bullet points in the question.
- Candidates should be highly credited if they draw conclusions which show interaction between the sources. Answers which merely repeat the source material without making judgements or drawing conclusions should be awarded **0 marks**.
- For **full marks**, three developed conclusions must be given.

3 mark conclusion

Candidate makes an original and insightful conclusion of their own which is supported by more than one piece of valid evidence drawn from two sources or from different parts of the same source. The conclusion will make a judgement and use evaluative terminology.

2 mark conclusion

Candidate uses a piece of evidence from the source as a conclusion. This conclusion will involve a judgement being made but will not be original to the candidate. For example, the candidate may quote a point directly from a source and use it as a conclusion. The conclusion will be supported by accurate and relevant evidence drawn from the sources.

1 mark conclusion

Candidate uses the prompts/headings to correctly organise information from the sources but does not reach any overall judgement or conclusion. Even although several pieces of evidence may be listed under the correct heading, limit this type of answer to **1 mark**.

Questions that require the candidate to use a limited range of sources by selecting evidence from them in order to make and justify a decision/recommendation.

- For **full marks**, the candidate must also explain why they have rejected the other option.
- Award up to **3 marks** for a justification depending on relevance and development of the evidence. Candidates should be highly credited if they make justifications which show interaction between the sources.
- For **full marks**, candidates must justify their decision/recommendation and explain why they have rejected the other option. Answers, which deal with only one decision, should be awarded a maximum of **8 marks**.

Questions that require the candidate to use a limited range of sources, detecting and explaining instances of exaggeration or selective use of facts, giving developed arguments.

- Award up to **3 marks** for a developed explanation depending upon the quality of argument and accurate use of evidence.
- For **full marks**, candidates must explain why the statement is selective in the use of facts; otherwise, a maximum of **6 marks** should be awarded. Candidates may demonstrate selectivity in the use of facts by using the evidence in the sources to show that evidence has been selected which supports the view and that evidence has not been selected which does not support the view.

Question			General marking instructions for this type of question	Max mark	Specific marking instructions for this question
					<p>Opposing the view ‘Foodbanks are an effective solution to food poverty.’</p> <p>Foodbanks are not an effective solution: the community representative in source 3 points out that they are only on the rise because it’s free and because it’s there. (1 mark—evidence drawn from source 3)</p> <p>Some household bills have actually decreased: broadband bills are 40% less in 2016 than they were in 2013 and rent and council tax have only gone up by a small percentage therefore people should have enough money to spend on food. The number of working age parents living in absolute poverty has not increased much since 2009 and so there is no need for food banks. (3 marks—evidence linked from within source 2 with evaluative terminology)</p> <p>Credit reference to aspects of the following:</p> <ul style="list-style-type: none"> • A useful emergency stopgap: not a long term solution • Not really needed: people who spend all their benefits use foodbanks (source 3) • Foodbanks don’t help people with long-term issues, such as addiction, alcoholism and mental illness. A local council is spending over £240,000 on foodbanks. It’d be better spent on addiction clinics (source 3) • Must address the real reasons why people can’t afford food (source 3) • Higher wages are a better solution to food poverty (source 3) • Free school meals are a better solution to food poverty (source 3). <p>Any other valid reason that meets the criteria described in the general marking instructions for this kind of question (see column to left).</p>

This is supported by source 3 which says that “Criminals are now using apps, such as WhatsApp and BBM, which are based on their smart phones to contact each other. This means that they do not have itemised bills and it is much more difficult to trace and investigate them.” This is supported further in source 2 where it shows that between 2013 and 2016 the most of the communications that was done in 2013 by people involved in organised crime was telephone calls and this had changed to WhatsApp and BBM in 2016.</p> <p>(3 marks)—accurate information from three sources with some evaluative terminology used regarding the pie charts in source 2, ie “most”)</p>
