General marking principles for National 5 English: Reading for Understanding, Analysis and Evaluation

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must **always** be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (d) Candidates should gain credit for their understanding of the ideas of the passage, and their analysis and evaluation of the writer's use of language.
- (e) Unless quoting from the passage, the candidates should use their own words as far as possible.

The following notes are offered to support markers in making judgements on candidates' evidence.
