National Qualifications 2017

Computing Science

Mark

# X716/75/01

TUESDAY, 16 MAY 1:00 PM - 2:30 PM

Full name of centre				Town			
Forename(s)		Su	rname			Number	of seat
Date of birt Day	h Month	Year		candidate			

Total marks — 90

SECTION 1 — 20 marks

Attempt ALL questions.

SECTION 2 — 70 marks

Attempt ALL questions.

Show all working.

Write your answers clearly in the spaces provided in this booklet. Additional space for answers is provided at the end of this booklet. If you use this space you must clearly identify the question number you are attempting.

Use blue or black ink.

Before leaving the examination room you must give this booklet to the Invigilator; if you do not, you may lose all the marks for this paper.

# SECTION 1 — 20 marks Attempt ALL questions

Describe how a real number is stored in a computer's memory.  The validity of a password is checked as part of a program.  Line 8 SET passValid TO false Line 9 RECEIVE userPassword FROM (STRING) KEYBOARD Line10 IF userPassword = storedPassword THEN Line 11 SET passValid TO true Line 12 END IF   State the data type used to store the variable "passValid".			
Line 8 SET passValid TO false Line 9 RECEIVE userPassword FROM (STRING) KEYBOARD Line10 IF userPassword = storedPassword THEN Line 11 SET passValid TO true Line 12 END IF	Describe	how a real number is stored in a computer's memory.	
••			
	 ine 8 ine 9 ine10 ine 11	SET passValid TO false RECEIVE userPassword FROM (STRING) KEYBOARD IF userPassword = storedPassword THEN SET passValid TO true	

1

State a suitable file format for the dog graphic.	1

6. An example of a URL (Uniform Resource Locator) is shown below.

https://www.largebank.com/loanadvice.rtf

Identify the standard file format that would be downloaded when this URL is selected.

7. Part of a program is shown below.

Line 1: DECLARE score AS REAL INITIALLY 0.0

Line 2: RECEIVE score FROM KEYBOARD

Line 3: IF score > 2.0 THEN

Line 4: SEND "Congratulations. You are in the final" TO DISPLAY

Line 5: ELSE

Line 6: SEND "You have failed to qualify" TO DISPLAY

Line 7: END IF

Describe what happens in Lines 3 to 6 when the value 1·4 is entered at Line 2. 2

Page 03

An example of a database record is shown below.

Employees						
Employee ID	Forename	Surname	Full Time	Home Phone Number	Mobile Phone Number	
2365	Dee	Rossborough	True	01383 712345	07974 354267	

(a) Explain why the Employee ID field requires a presence check.				
(b)	Employee photographs are to be added to the database record.			
	State a field type which should be used to contain a photograph of each employee.			
	te the component that enables a processor and a hard disk drive to nmunicate.			
com	ne digital video cameras allow videos to be downloaded to computer			
com	nmunicate.			
Som	ne digital video cameras allow videos to be downloaded to computer			
Som syst Stat dow	ne digital video cameras allow videos to be downloaded to computer tems using both a wired and wireless connection.			

1

visited by	a user are no	ot saved.		

State the feature of a web browser that ensures that the history of websites

12. A complex condition is used to decide if hotel customers qualify for a free night's stay. Part of the program is shown below.

Line 21 IF nightsBooked >= 6 AND (NOT (cardType = Bronze)) THEN

Line 22 SEND custName TO DISPLAY

Line 23 **END IF** 

. . .

State all possible outputs when the following test data is used in this program. 2

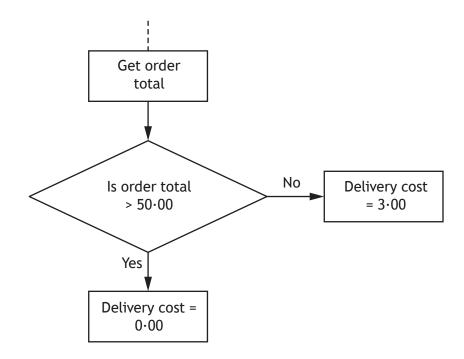

custName	cardType	nightsBooked
J Kerr	Gold	3
P Singh	Silver	8
R Kroon	Bronze	7
H Smith	Gold	6

Page 06

# SECTION 2 — 70 MARKS **Attempt ALL Questions**

14. Bike Scotland uses a flat file database to store details of its members and affiliated cycling clubs.

Membership Number	Forename	Surname	Date of Birth	Club Code	Club Name	Founded	Number of Members
011-423	Alojzy	Czajka	15/03/1979	24FW05	Free Wheel	16/10/2000	67
192-033	Donny	Carruthers	20/02/1982	77SU22	Spokes United	29/04/1985	29
213-847	Salim	Hanif	09/06/1994	12DW39	District Wheelers	03/01/1954	45
624-536	Harry	Fence	01/02/1963	12DW39	District Wheelers	03/01/1954	45
018-253	Derrick	Smith	12/12/1970	77SU22	Spokes United	29/04/1985	29
773-362	Maria	Amonte	02/11/1999	24FW05	Free Wheel	16/10/2000	67
836-555	Fiona	Hewitt	20/02/1972	77SU22	Spokes United	29/04/1985	29
983-543	Samantha	Wellbeck	18/09/1975	77SU22	Spokes United	29/04/1985	29
098-133	Tracy	Uttley	30/05/2000	12DW39	District Wheelers	03/01/1954	45

(a)	State	the <b>field type</b> used to store each Membership Number.
(b)	The o	database contains personal information.
	(i)	State the <b>Act</b> with which Bike Scotland must comply.
	(ii)	Describe what Bike Scotland must do to ensure it complies with this Act when collecting this information.

2

#### 14. (continued)

The database is redesigned and implemented as a relational database with two linked tables.

#### Cyclist

Membership Number	Forename	Surname	Date of Birth	Club Code
098-133	Tracy	Uttley	30/05/2000	12DW39
213-847	Salim	Hanif	09/06/1994	12DW39
624-536	Harry	Fence	01/02/1963	12DW39
011-423	Alojzy	Czajka	15/03/1979	24FW05
773-362	Maria	Amonte	02/11/1999	24FW05
018-253	Derrick	Smith	12/12/1970	77SU22
192-033	Donny	Carruthers	20/02/1982	77SU22
836-555	Fiona	Hewitt	20/02/1972	77SU22
983-543	Samantha	Wellbeck	18/09/1975	77SU22

#### Club

Club Code	Club Name	Founded	Number of Members
12DW39	District Wheelers	03/01/1954	45
24FW05	Free Wheel	16/10/2000	67
77SU22	Spokes United	29/04/1985	29

file database for storing the data.			
Advantage 1			
Advantage 2			
3			

(c) Describe two advantages of using a relational database rather than a flat

(i)	)	Explain why the Club Code field is a primary key and a foreign key in the relational database.
(ii	i)	When adding a new club to the Club table the following error message is displayed:
		Club code 120YB22 is invalid, please re-enter
		State the validation that has been applied to the field Club Code.
		Cyclist table has been sorted on two fields.
D	esc	ribe how the table has been sorted.

Page 09

15. A program is being developed to monitor the availability of parking spaces in a multi-level car park. The car park has three levels, each with 50 numbered spaces and a digital display board that shows the number of spaces available on each level.

Level	Numbered Spaces
Red	1–50
Black	51–100
Yellow	101–150

SPACES AVAILABLE
Red Level 8
Black Level 25
Yellow Level 32

Part of the program is shown below:

Line 1	DECLARE redAvailable AS INTEGER INITIALLY 50
Line 2	DECLARE blackAvailable AS INTEGER INITIALLY 50
Line 3	DECLARE yellowAvailable AS INTEGER INITIALLY 50

• • •

< vehicle is detected occupying a space>

• • •

Line 22 IF spaceNumber ≥1 AND spaceNumber ≤50 THEN Line 23 redAvailable = redAvailable – 1

Line 24 END IF

. . .

(a) Explain why integer data types are used in Lines 1 to 3.

1

### 15. (continued)

When a vehicle parks, the digital display board will be updated to show the number of available spaces on each level.

SPACES AVAILABLE
Red Level FULL
Black Level 8
Yellow Level 32

	<b>(1)</b>	
(c)	(1)	Complete the condition below, that will display the message "FULL" when all the spaces on the Red Level are occupied.
		IFTHEN
		SEND "FULL" TO DISPLAY
		END IF
	(ii)	Each of the letters of the message <b>FULL</b> will be stored as an ASCII character.
		Calculate the number of bits required to store this message.

# 15. (continued)

	the decimal equivalent of the binary number 01101100.
	e the parking space program is being developed, it is executed using terpreter.
(i)	State one advantage of using an interpreter rather than a compiler at the development stage of a program.
(ii)	The finished program is compiled
(ii)	The finished program is compiled.  State two advantages of executing a compiled version compared to an interpreted version.
(ii)	State two advantages of executing a compiled version compared to an interpreted version.  Advantage 1
(ii)	State two advantages of executing a compiled version compared to an interpreted version.

17. An online pet supply retailer is offering a special deal to customers buying at least two, but not more than six, bags of pet food. If customers try to buy any other quantity, a message is displayed.

For example:

(a) Show, using pseudocode or a programming language of your choice, how input validation could be used to ensure an acceptable number of bags is entered.

Page 18

### 17. (continued)

(b) The data in the table below will be used to test the program. Complete the table.

2

Type of Test Data	Test Data	Expected Results
Extreme		Proceed to next section of code
Exceptional	Three	Program cannot run! Invalid data type
	4	Proceed to next section of code

(c) When testing the program using the data from the table, "Three" is entered. As expected, an error message appears.

Program cannot run! Invalid data type

	(i)	Name this type of error.
	(ii)	Explain why this error occurred when testing the program.
(d)	•	etax error can occur when writing code.  Explain what is meant by a syntax error.
	(ii)	Explain how the editing features in software development environments can help identify syntax errors.

Page 19

- Fass is an art dealer. When he visits an artist's studio, he uses a catalogue app on his mobile phone to store photographs and information about artworks he plans to sell.
  - (a) Fass has bought a new mobile phone.

Old Phone					
Processor	Dual-core 2·5GHz				
Memory	1GB RAM				
Camera	16 Megapixel Rear 2 Megapixel Front				
Storage	32GB Solid State				
Screen Size	1334x750 pixels				
Additional Features	Biometric Security				

New Phone						
Processor	Quad-core 2·5GHz					
Memory	2GB RAM					
Camera	16 Megapixel Rear 2 Megapixel Front					
Storage	32GB Solid State 1TB Free Cloud					
Screen Size	1920x1080 pixels					
Additional Features	Biometric Security Automatic Cloud Backup					

(i)	State one feature found on the new phone that may allow the catalogue app to run faster than on his old phone.	1
(ii)	Fass uses cloud storage to store the photographs.	
	State one advantage and one disadvantage of cloud storage instead of his local phone storage.	2
	Advantage	
	Disadvantage
